Notes: The quoted resources shown in the graph are “Pre-Mined Resources”; Pre-Mined Resources refers to Current Resource plus Historic Production (adjusted, where possible for processing losses); Current Resource refer to Measured + Indicated + Inferred Resources. Current Resource are inclusive of any reported Proven & Probable (P&P) Reserves where appropriate.

Of the listed camps/deposits Kabanga and Jaguar are the only projects that have resources that are yet to be mined. Camps are a collection of deposits sharing a common proximal location and geology - and they usually share a common processing facility. When a set of mines is owned by a single company, the reported endowment often refers to the entire camp.

- a) The Norilsk and Talnakh deposits are now treated as separate camps - the Norilsk name remains associated with the Talnakh deposits as it is the historical name and more recognisable to the market;
- b) The Talnakh and Norilsk 1 figures are for the combined M&I Resource. NorNickel does not report Measured and Indicated (M&I) Resources on a separate basis and Resources are not JORC compliant;
- c) Jinchuan Group does not report any official Resource figures for Jinchuan. For completeness MinEX have set the Measured Resource to match the most recent published Reserve, these are not JORC compliant;
- d) The P&P Reserves have been allocated across both the Measured and indicated Resource figures;
- e) The Measured Resource includes 31.1 Mt @ 1.791% Ni of P&P Reserves;
- f) MinEX have assigned all of the P&P Reserves to the published Measured Resource;
- g) In October 2022 Mincor Resources announced that the LN04a deposit contained a P&P Reserve of 0.136 Mt @ 3.6% Ni. The associated Resource is allocated to the Resource figures for Long and Durkin North deposits;
- h) Cumulative historical production are estimates by MinEx Consulting based on available published data from various sources (in the first instance the operating company itself);
- i) Companies with resources within the Sudbury Camp include: Vale, Glencore, KGHM, Magma Mining, SPC Nickel Corp and First Nickel;
- j) Companies with resources within the Thompson Belt Camp include: Vale, Blackstone, CaNickel Mining and Mistango River Resources;
- k) Companies with resources within the Kambalda Camp include : Lunnon Metals, Wyloo Pty Ltd, Cherish Metals, Westgold Resources, Develop Global Ltd and Lefroy Exploration.
